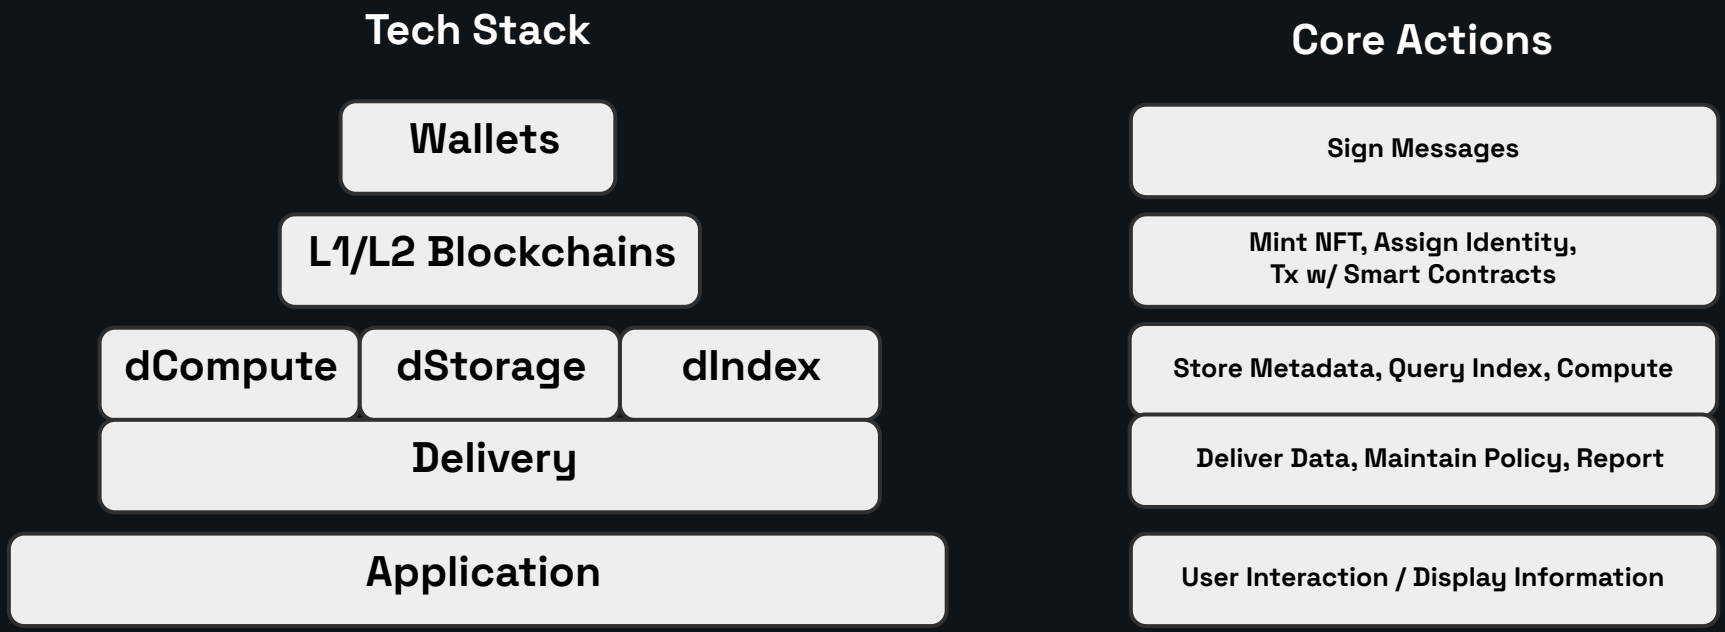
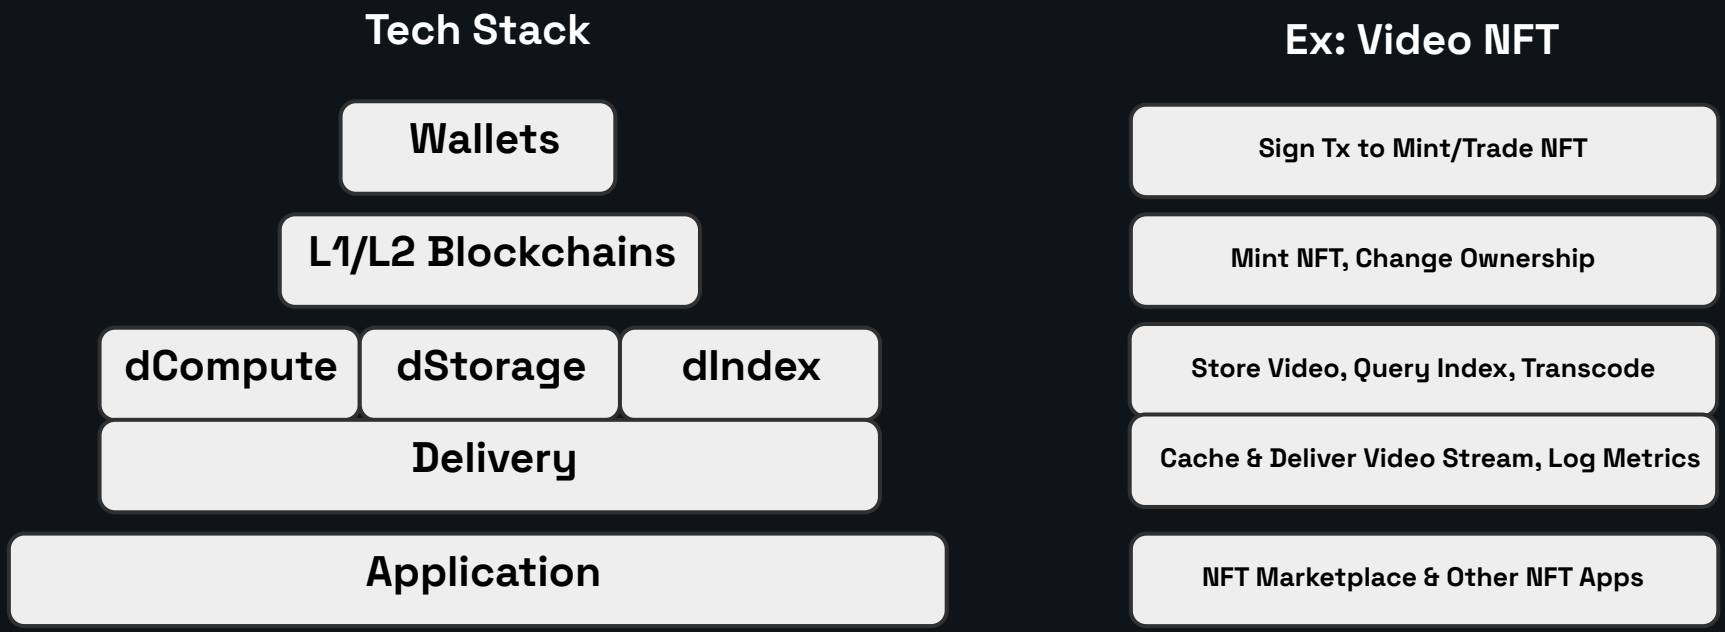
The Web3 Video Tech Stack



livepeer LIVEPEER STUDIO

The Web3 Video Tech Stack



Web3's Unique Value

1. Permissionless Crowdfunding
2. Decentralized Financial Instruments
3. Provable Digital Ownership
4. Collective Global Coordination

Web3's Unique Value

1. **ICO** - Permissionless Crowdfunding
2. **Defi** - Decentralized Financial Instruments
3. **NFT** - Provable Digital Ownership
4. **DAO** - Collective Global Coordination

How to Compete?

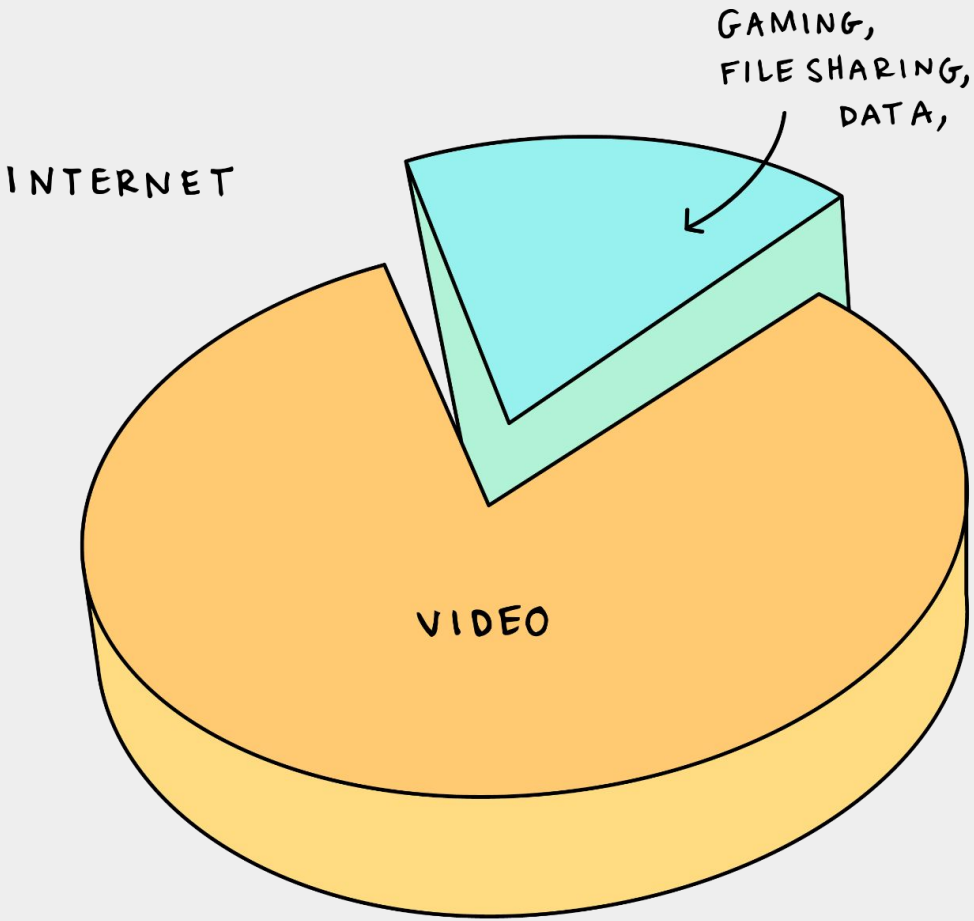
- Come for the tools, stay for the network
- Use web2 platforms as distribution channels

Solve Web3 Centric Problems

- DAOs need a place to organize content
- Web3 content needs to curated
- Web3 content can be incentivized

Some Opportunities

- Web3 native video CMS
- Curation DAO
- Tools for creators with sub 100k followers



Today, 80% of all internet bandwidth is consumed by video streaming.

It's easy to understand why: video is **engaging**, **educational**, **illuminating**, and **empowering** 💪

This actor, Guillermo Campra, had never used a golf club before this
miguelfaus
13/ Before Ana cleans Jacobo's room, she sees him from the balcony as he relaxes on the pool. The distance between them and their respective social roles is very clear in this image, but the traditional order (rich = 'high' class / poor = 'low') is inverted. Who's more powerful?
miguelfaus
This is the only scene shot this way, with a shot reverse-shot that feels like a ping-pong: 2 static wide shots that are exactly 180° from one another. This highlights the huge gap & differences between the two women, and also the fact that the scene is like a chess-match.
